Siahbatterson@gmail.com

About me

I am an emerging data scientist with hands-on experience in data analysis, software development, and IT support. I bring a strong foundation in Python, data validation, database management, and front-end development. I am passionate about leveraging data to drive insights, optimize systems, and support organizational growth.

Experience

January 2025 — Current

National Community Church - Software & Data Contractor

- Networking and maintenance and upgrades. As well as configuration and diagnoses of a large scale networking environment.
